RCRA RECORDS CENTER

Dear Mr. Jensen:

RE: Hazardous Waste Manifest
Square D Company
EPA I.D. No.: IAD00819110

This is to acknowledge the receipt of your January 29, 1986 Hazardous Waste Manifest. Ken Herstowski of my staff discussed with you on March 4, 1986 the following items that should be considered when completing your manifests.

1. Section B - "Same" should appear if your mailing address is the same as your street address.
2. Section H - The telephone number of the disposal facility was missing.
3. Section 14 - The correct abbreviation for gallons is G not GL.
4. Section 15 - Waste Minimization Certification. The July 15, 1986, Federal Register requires generators to certify that they complied with the waste minimization requirements unless exempted i.e. small quantity generator. The generator shall state in this certification that:

a) The generator of the hazardous waste has a program in place to reduce the volume or quantity and toxicity of such waste to the degree determined by the generator to be economically practicable; and

b) The proposed method of treatment, storage or disposal is that practicable method currently available to the generator which minimizes that present and future threat to human health and the environment.

40 Code of Federal Regulations 262.22 does not require the submittal of a copy of the Hazardous Waste Manifest to the EPA.

If you have any questions, please contact Ken Herstowski at (913) 236-2888.

Sincerely yours,

Luetta A. Flournoy
Chief, Iowa Section
RCRA Branch
Waste Management Division
